**DETAILED ACTION**

This office action is in response to Paper No: 10, received 7/8/03, in which applicant canceled claims 83, 89, 90 and 97; amended claims 82, and 84-86; and added new claims 168-211.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 168-211 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

Claims 82 and 84-86 are pending.

*Information Disclosure Statement*

The information disclosure statement received 7/8/03 (Paper No: 12) is acknowledged. A singed copy is enclosed hereto.

*Claim Rejections - 35 USC § 103*

The rejection under 35 U.S.C. 103(a) of claims 82, and 84-86 is maintained for reasons of record. Applicant's declaration was not found persuasive based on the third paragraph of the declaration, in which applicant states that original notebook records demonstrate an actual

reduction to practice of the claimed invention prior to August 6, 1997. The declaration nor the lab notes contain a date which shows when the claimed invention was reduced to practice.

***New Rejection***

***Claim Rejections - 35 USC § 103***

Claims 82 and 84-86 are rejected under 35 U.S.C. 103(a) as being unpatentable over Barrows (USPN 5,583,114).

The claimed invention and Barrows teachings are described in Paper No: 8. Barrows describes a second component of the mixture as a water-soluble crosslinking agent (see abstract). Barrows discloses the preferred crosslinking agent include polyethylene glycol (see column 2, lines 37-38). A web search of the SIGMA-ALDRICH web site ([www.sigma.com](http://www.sigma.com)) under the keyword “surfactants” listed poly(ethylene glycol) monolaurate.

It would have been *prima facie* obvious to one of ordinary skill in the art at the time the invention was made to have used the composition of Barrows, as the invention is related to an adhesive composition which may be used to bond or seal tissue *in vivo* (see abstract).

***Conclusion***

All claims are rejected.

Art Unit: 1654

Applicant's action necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Roy Teller whose telephone number is (703)305-4243. The examiner can normally be reached on Monday-Friday from 5:30 am to 2:00 pm.
